DATA ANALYSIS PROCESS

BRIGHT COFFEE SHOP

1

Business Problems

we need to know if the business is making profit or loses.
we want to see how can we grow and improve business revenue

2

Data Questions

which product sells most ?
What are daily Sales ?
which hours are busiest ?
What is average order value

3

Data Collection

Collect POS Sales data: Order ID,Date,Time, Product,Category,Quantity,Price and Payment method

4

Data Inspection

Checck Missing Values , duplicate orders,Incorrect prices,date/time formats and unusual quantities

5

Data Processing

Clean & Transform data using SQL in databricks remove duplicates, handle Nulls,Calculate total sales , Quantity,& Price

6

Sales Analysis

we export our data from databricks to excell for visualization by creating pivot tables showing total revenue per product type,peak time interval for sales & best Selling Product.

7

Data Presentation

we will present our findings key insights from our analysis backed by visuals in a canva presentation

8

Daily Monitoring

we will Monitor daily revenue ,product trends,peak periods and stock demand
